D900 GLASSWARE DRYER

APPLICATION

The BetterBuilt D900 Dryer features a fan driven convection air pattern for uniform heat within the cabinet. This High Speed Glassware Dryer is a companion to our Glassware Washer Model G302. Glassware processing time is equal to or less than the glass washer processing time, to keep production and efficiency at maximum levels.

When the cabinet is fitted with the optional header track, loaded racks can be moved directly from the washer to the dryer using a transfer cart. This large capacity dryer has a space in the lower portion of the cabinet for bulk drying of carboys while other glassware can be placed on the stainless steel adjustable wire shelves.
