## CAGE & RACK WASHER ACCESSORIES

### HIGH CAPACITY CAGE WASHING SYSTEM MODEL VHS6D

This high capacity cage washing system designed for the R600 Series washers only. Two double sided, multi level racks hold rodent cages in position for thorough cleaning and draining. Back supports can be adjusted to accept cages of different depths. The central spray manifold, together with a dedicated high capacity wash cycle ensures complete coverage from all angles. This high capacity system holds up to 200 standard mouse cage bottoms or 60 standard rat cage bottoms per load.

### BOTTLE WASHING CART MODELS BWC6, BWC9

The bottle washing cart holds up to 10 standard size baskets per load, based on basket configuration. Bottles are overturned onto the deck of the cart for exposure to spray solution. A dedicated bottle washing cycle activated from the washer control panel ensures complete coverage from above, below and both sides. The cart can also be used to process baskets of sipper tubes and miscellaneous items. A cart lock connection fitting at the washer floor grating, allows the cart to be engaged automatically without the need for manual tightening. This makes loading simple and safe.

## UNIVERSAL CAGE & PAN WASHING RACK MODEL UC6

The cage and pan washing rack is used to process common sizes of rodent cages and debris pans, holding them in position for thorough spray coverage. All components of the rack are compatible with alkaline and mild acid detergents. Swivel casters make the rack easy to manoeuvre. The rack holds 48 standard mouse cage bottoms or 18 standard rat cage bottoms per load.

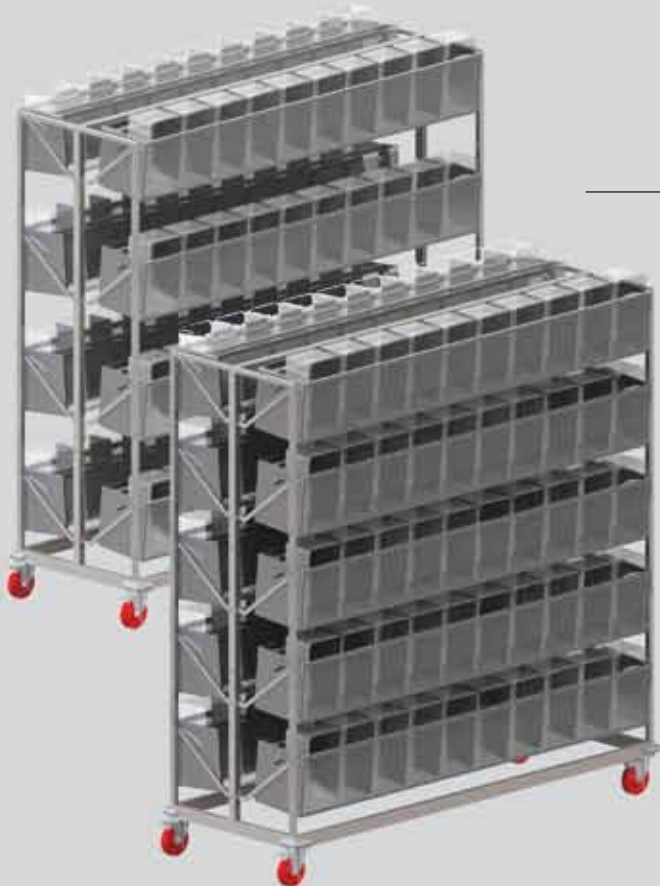

## UNIVERSAL BASKET RACK MODELS R44, R48, R410, R54, R58, R510

This versatile rack features a unique tilting basket design for easy loading and unloading. The baskets may remain tilted or can be returned to their upright position during use depending on user preferences. This rack will accept rodent cage bottoms, lids and screen as well as smaller items such as sipper tubes and enrichment toys. The five level model R510 Universal Basket Rack can hold up to 100 standard mouse cage bottoms or 40 standard rat cage bottoms per load.

### NOTES:

- (1) Standard Mouse Cage Bottom size 7.25"W x 11.5"L x 5"D [184mm x 292mm x 127mm]
- (2) Standard Rat Cage Bottom size 11"W x 17"L x 7.25"D [279mm x 432mm x 184mm]
- (3) Top row of Standard Rat Cages must be positioned horizontally for load clearance purposes.
- (4) Cage capacity varies depending on cage model from each manufacturer.
- (5) Standard Bottle Basket size 12.5"W x 18.5"L [318mm x 470mm]
